

Metro point of sale reader

Designed to interface to a wide range of Point of Sale (EPOS) terminals, the Metro PoS reader allows you to extend your cashless scheme to all areas of catering and retail operation.

Cashless Point of Sale terminals help remove the issues normally associated with traditional 'cash' handling at the till point. Queuing, float management and hygiene problems are all significantly reduced. The counter-top reader is simple to use and clearly displays the users balance plus any subsidy entitlements available.

Removing cash and introducing cashless point of sale terminals can increase customer throughput by a factor of three.

Features Summary

- Euro ready
- Compatible with Uniwell and IBM SurePoS terminals
- Can be used with contactless cards and keys, or contact cards
- Rugged lockable enclosure
- Clear backlit LCD display for balance and customer instructions
- Identifies up to 500 different user groups using a cash purse and subsidy on their cards/keys
